Call for Reviewers for the Journal ABC Cardiol

With more than 70 years of history, Arquivos Brasileiros de Cardiologia (ABC Cardiol) is one of the leading journals for the dissemination of Brazilian scientific research in the field of cardiovascular sciences.

Published in two languages and indexed in the main international databases, all scientific contributions are peer-reviewed by members of the Editorial Board and Reviewers' Board, selected from leading researchers in Brazil and abroad. Manuscripts are accepted based on their relevance and originality, scientific accuracy, and importance for the advancement of science.

This journal follows the Open Access model, allowing unrestricted online access (including no financial barriers) to all scientific content published. It is indexed in major databases such as PubMed Central (PMC), PubMed, Web of Science, Scopus, SciELO, LILACS, and DOAJ, and is currently ranked as Qualis A2 by the Brazilian Coordination for the Improvement of Higher Education Personnel (CAPES).

Published articles are divided into 12 thematic areas, each coordinated by an Associate Editor: Clinical Cardiology, Surgical Cardiology, Interventional Cardiology, Pediatric/Congenital Cardiology, Arrhythmias/Pacemakers, Noninvasive Diagnostic Methods, Basic or Experimental Research, Epidemiology/Statistics, Arterial Hypertension, Exercise Testing, Exercise and Cardiac Rehabilitation, Heart Failure, and Acute Coronary Disease.

Role and Responsibilities of Reviewers for ABC CardiolCardiologia

1. Reviewers will be selected by the Editor-in-Chief from professionals in Brazil and abroad. To maintain reviewer status, the following criteria must be met:

a) Availability to review at least 12 manuscripts per year;
b) Conduct reviews with high scientific and methodological quality.

At the end of each year, a list of contributing reviewers will be published. Reviewer responsibilities include:

a) Evaluating manuscripts from a scientific and methodological perspective, suggesting revisions to authors and advising Editors on publication priority;
b) Identifying and reporting potential conflicts of interest of authors to the Editors;
c) Being able to perform reviews in both Portuguese and English.

2. Eligibility Requirements:
a) Completed undergraduate degree in the health sciences;
b) Completed Master's or PhD degree in the health sciences;
c) Proven academic experience, with at least one article published in a journal indexed in PubMed or Scopus;
d) Submission of an updated Lattes CV;
e) Submission of a statement of interest, including commitment to perform up to 12 reviews per year.

3. Reviewers will report to the Editor-in-Chief.

Application

1. The online application form will be available at the following link from April 1 to April 10, 2026: https://cardiol.typeform.com/to/g1sV0Pdf.

2. The list of approved applications (candidates who meet all required criteria) will be published on the journal's website on April 15, 2026.

Final Results

The final results will be announced on April 20, 2026, on the journal's website.

Training

Selected reviewers will receive training to learn how to operate within the journal's submission system before beginning their activities.

Timeline

Applications: April 1–10, 2026
Approved applications: April 15, 2026
Final results: April 20, 2026
